ABOUT US

SBS Water & Infra team of engineers, scientists, and professionals passionate about changing the world of water through innovative, sustainable technologies. SBS stands for Sustainable Business Solutions. SBS specialize in providing plug-and-play, high quality, and cost-effective water and wastewater treatment solutions that can be quickly installed, automatically operated, and easily maintained so you get reliable clean water.

VISION

SBS strive to be customer's most trusted supplier by solving problems with the right people, the right experience and the right technology. We're built to deliver value. Our innovative process and water treatment solutions drive sustainability by reducing water and energy use and raw material waste while improving operational efficiency, productivity and yields. Complete satisfaction of customer with zero liquid discharge and reduction of freshwater consumption.

The leader in complete water and wastewater treatment solutions

SBS Water & Infra Projects Pvt. Ltd. has been delivering innovative and sustainable solutions for several applications and processes like condensate treatment, wastewater treatment and effluent treatment. SBS has built a great reputation for itself by manufacturing exceptional quality **condensate polishing units, water treatment plants, reverse osmosis plants, wastewater treatment plants and critical wastewater treatment systems.**

We have a state-of-art facility, where we have latest technology and machinery to achieve highest performance water-treatment plants. We keep on upgrading our facilities to improve the quality of projects. And having annual turnover of up to 50 crore and has 100+ employees.

Our projects are widely appreciated and recognized by our clients for their service life, productivity, robustness, and ability to withstand tough weather conditions. We provide customized plant as per the requirements of our clients in the best way possible. Further, we also provide **installation services** to our clients.

Our wide range of technologies and extended know-how in all water-related sectors will guarantee you a cost-efficient solution meeting your water quality requirements.

MISSION

SBS's mission is to enable our customer's success through innovative water treatment solutions. We're proud to work toward a world where true operational efficiency and sustainability are delivered and documented more effectively than anyone could imagine.

"SBS exist to improve the quality of life in our communities, helping them to attain sustainable life by serving and delighting our customers, giving time and benefits to our community, growing employees and helping them realize their full potential, and leading others by inspiring them to give, serve and grow."

OUR CORE VALUES

Sustainable
Business
Solutions

Protect Water

We are committed to protecting, preserving, and perpetuating water, one of the world's most important assets.

Accessibility

We strive to make water and wastewater infrastructure affordable for all.

Sustainability

We seek to provide resilient eco-friendly energy-efficient solutions.

Innovation

We continuously innovate to deliver more for less.

Integrity

We treat customers, employees and suppliers with honesty, integrity, and respect, building long-term relationships for mutual advantage.

SERVICES

- Distillery Condensate Polishing Units
- Sugar Condensate Polishing Units
- Distillery Water Treatment Plants
- Sugar Water Treatment Plants
- Distillery Effluent Treatment Plants
- Water Treatment Plants
- Effluent Treatment Plants
- Sewage Treatment Plants

CORE STRENGTH

- Energy-efficient technology that lowers CAPEX and OPEX.
- Packaged and pre-engineered decentralized treatment solutions for quick deployment.
- Knowledge about upstream and downstream operations in sugar and distillery industry, which help us to understand treatment of condensate in sugar and distillery process operations without affecting the performance.
- Complete zero liquid discharge solution with CPU discharge recycle, we will provide technical support for recycling **treated condensate to fermentation and cooling tower**.
- We have specialized **technical team** in fermentation troubleshooting and cooling tower performance while recycling.
- State of art manufacturing and design facility in Pune location.
- Customer satisfaction in terms of delivery performance with respect to quality and quantities.

INDUSTRY WE SERVE

- Sugar Industry
- Ethanol Industry
- Chemical Industry
- Food Industry
- Municipal Corporations
- Paper & Textiles Industry
- Pharma Industry
- Private and Govt. Sector

The leader in complete
water and wastewater treatment solutions

PRODUCT DETAILS

- Water Treatment Plants
- Process Condensate Treatment Plants
- Sewage Treatments Units
- Zero Liquid Discharge Schemes
- Effluent Treatment Schemes
- Demineralization Plants
- Desalination RO based

India's Biggest Pre-Fabricated STP, Dahod Smart City, Gujarat - 8 MLD Plant

Packaged Drinking Water Plant - 350 KLPD

Gangamai Industries & Constructions Ltd., Maharashtra
PCTP - 1400 m³/Day
